Bioastronomy 2002
Please Close the Glass Doors when you are out of your room. This will prevent bird life entering your room and damaging or removing your possessions.

Please DO NOT feed the birds as this causes reliance on an artificial food source, disturbance to other guests.
NAI's Mission

- Conducting basic research on the causes, nature, and distribution of the 21st Century's major neurological and psychiatric disorders
- Studying the normal functions of the nervous system in order to understand and harness the brain's potential
- Training the next generation of neuroscience researchers and clinicians to lead the research and development of effective treatments for the major disorders of the nervous system
- Spurring the collaborative efforts of the nations of the world to address the global burden of neurological and psychiatric disorders
Early speculations

Schrödinger: We must be prepared to find a new kind of physical reality, something on which we [sic].
